

OWASP Delaware: 2025-06 Meeting

david.rhoades@owasp.org

31-Mar-2026

Agenda

OWASP: Who? What? Why?

DE Chapter: Where? When? How? **HELP!**

Main Event:

Why APIs Are Every Attacker's
Favorite Target - by Dan Barahona

Open: Everything at OWASP is radically transparent from our finances to our code.

Innovative: We encourage and support innovation and experiments for solutions to software security challenges.

Global: Anyone around the world is encouraged to participate in the OWASP community.

Integrity: Our community is respectful, supportive, truthful, and vendor neutral

Open Worldwide Application Security Project (OWASP)

- The **Open Worldwide Application Security Project** (OWASP) is a nonprofit foundation that works to improve the security of software.
- All of the OWASP tools, documents, forums, and chapters are **free and open to anyone** interested in improving application security.
- The OWASP Foundation is a not-for-profit entity that ensures the project's long-term success.

Time for mini-CTF?

Let's hack some AI

Portswigger's Web Academy

Target: **Web Academy – Learning**

Path: *Web LLM attacks*

<https://portswigger.net/web-security/learning-paths/llm-attacks>

PRACTITIONER

Web LLM attacks

This learning path teaches you how to perform attacks using Large Language Models (LLMs). You'll learn how to construct attacks that take advantage of an LLM's access to data, API, and user information that you would not be able to access directly.
